

MARKET BROKER

PRESS RELEASE

October 15, 2021

New Office Financial District of London - 2023

Market Broker is a fully regulated global brokerage and has been assisting clients for over 11 years. Offering investment products, investment advice, personalised accounts, trading tools and resources to take charge of your investments.

The Global Operations Manager, Sebastian Murphy said yesterday, "London is the next sensible choice for an office due to its strategic time zone in Europe. European clients will be able to access staff at our London office and carry out transactions during London trading hours. This will alleviate waiting time for transaction/research information from our Tokyo or New York offices. Our main objective is to ensure that our existing clients get timely service and access that they need, and we welcome new European/UK clients to join our thousands of satisfied customers." He went on to say that, "we expect the office to be open in June 2023 and we are currently looking at different locations that will meet our needs from 2023 and into the future."

The new office will continue to provide cutting edge technology to our clients as it is tested and developed so that we stay ahead of our competitors to provide the best service and support that we have built our reputation on. The office will house a trading desk, support and sales teams and a research department to provide our clients with up to the minute news and market movements. The process of moving has already begun as we are seeking a location for a new data storage center in Europe, which will entail encrypted security, uninterruptible power supply, physical and cloud servers that will meet future demands and maintain the integrity of our data and telecom systems.

Market Broker is a global financial institution, assisting investors world-wide to maximise their investment decisions, through extensive research data and bespoke advisory services. Founded in 2010, and boasting over +10k clients globally, we strive to assist our clients in achieving their investment goals.
